

## **T4T and Ben & Jerry's team up for New Americans online technology education**

Friday August 21, 2020

TECHNOLOGY FOR TOMORROW (T4T) is pleased to announce that it has received a \$1,000 grant from Ben & Jerry's to provide technology education and workshops for New American learners enrolled with the U. S. Committee on Refugees and Immigrants (USCRI).

With the prevalence of technology in daily life and with the growing populations of new Americans in Vermont, collaborative partnerships such as this between T4T, USCRI, and Ben & Jerry's are of the utmost importance. As COVID-19 has created significant challenges for New Americans, including participating in our technology classes, this partnership enables important opportunities for New Americans to access our technology education program virtually. The skills learned in these online classes and workshops will foster new career opportunities and personal fulfillment, easing the transition into life in Vermont. The grant from Ben & Jerry's will ensure that this critical technology program will be delivered successfully online to this underserved community.

Technology for Tomorrow, a non-profit 501(c)(3) organization, empowers people in need by providing affordable technology education and supporting skills through various local, state, and national collaboration efforts, in order to help individuals reach their professional and personal goals.
