

T4T and People's United Bank team up for New Americans tech education

Thursday July 27, 2020

TECHNOLOGY FOR TOMORROW is pleased to announce that it has received a \$1,000 grant from the People's United Bank to provide technology education for New Americans enrolled with the U. S. Committee for Refugees and Immigrants (USCRI) in Vermont. The programming funded by this grant will take place in our virtual classroom on Zoom on Wednesday mornings.

With the prevalence of technology in daily life and with the growing populations of New Americans in Vermont, collaborative partnerships such as this between the USCRI and Technology for Tomorrow are of the utmost importance. These partnerships enable important learning opportunities for New American learners in locations convenient to them, including in our virtual classroom. The skills learned in these classes will foster new career opportunities and personal fulfillment, easing the transition into life in Vermont.

Technology for Tomorrow, a non-profit 501(c)(3) organization, empowers individuals and organizations by providing affordable technology and supporting skills training and enabling virtual opportunities through various local, state, and national collaboration efforts to help individuals and organizations reach their goals.
