

2022 IMPACT REPORT

Technology for Tomorrow

Empowering People in Need with Technology Education
A non-profit 501(c)(3) organization

476 Shunpike Rd, Williston, VT 05495

Vision

- Those in need have access to affordable technology education that improves their quality of life personally, professionally, and in the community.
- People of all ages recognize and act upon the need to help others.

Mission

Technology for Tomorrow, a non-profit 501(c)(3) organization, empowers individuals and organizations by providing affordable technology, supporting skills training, and enabling virtual opportunities through various local, state, and national collaboration efforts to help individuals and organizations reach their goals.

PLAY

The turn of each year is a time we use to reflect on the progress we've made towards our mission and refine our approach for the year ahead. The theme for 2022 was scale and growth—not only as a team, and but also for the programs that we run and partners that we work with.

As we look back at nearly 100 events and workshops ran in 2022 , it's been incredible to continue working with so many partners doing really special work with senior citizens, new American communities and corporate philanthropy. We welcomed new team members, and also saw increased demand in our partner program and added over a dozen corporate partners and sponsors as well. We couldn't be more excited to keep growing our reach and continue helping improve technology literacy outcomes.

We'd like to thank all of you for our continued support and encourage you to please reach out if you'd like to support, partner, or collaborate in the year ahead.

Neel Desai, Board President

Participants Served by Numbers

691 total learners served

94 training events held

62% of all learners were older adults

56% of all older adult learners were women

38% of all learners were New Americans

22% of all New American learners were women

2022 was an exciting and eventful year for T4T.

We've strengthened our existing partnerships and forged new ones. We used our experience to fine-tune our instructional design and delivery to make technology education enjoyable and valuable.

We'd like to invite you to learn more about our organization's programs, events, and partnerships.

In gratitude.

Ranga Chilakamarri, Program Manager

CLIENT TESTIMONIALS

We have contracted Technology for Tomorrow to provide computer classes for both our staff and the participants we serve via our employment readiness programs. This T4T team is mission driven, organized, versatile and willing to personalize their courses for optimal relevance to the students in front of them. They are flexible with scheduling, adaptable to student needs, extremely resourceful, and friendly- a pure joy to work with. We are already seeing a long-term impact from their instruction on our staff's professional development and effective service delivery. Two thumbs up!

David Justice
Associate Director, Vermont Adult Learning

We have been working with Technology for Tomorrow for the past several years to lead classes for our members on a variety of topics. We are continuously impressed with the instructors' level of knowledge, clear and concise presentation, and personal approach. It doesn't matter if there are 10 people in the class or 50, the instructors have figured out the perfect balance of ensuring everyone gets their questions asked while still delivering a high level of support to the entire group. In addition, our collaboration with T4T has been instrumental in helping to ease our audience into a more digital world during the pandemic, and I highly recommend their services to other organizations working with older Vermonters.

Laura McDonough
Associate State Director, Communications, AARP Vermont

CLIENT TESTIMONIALS

Technology for Tomorrow (T4T) has helped to develop a new level of confidence with technology for our clients. The entire team at T4T has been integral to the success of our Creative Care Kit program, a program focusing on creative expression through arts and technology. Communication between our two organizations has been easy to schedule and fluid, with T4T always eager and willing to iterate, improve, and support as needed. Participants in our program had an initial phone training with a highly qualified T4T trainer, followed by a Zoom training to help them get up to speed on the iPads we provided through the program. Our program participants have had very positive experiences with the T4T trainer, describing him as patient and helpful. We are excited to continue our partnership and develop new ways to support older adults as they build technology skills.

Luke Rackers

Director, Development and Communications, CVCOA

When Brattleboro became a refugee resettlement site last October, we were lucky to find T4T as ready and able partners in providing support to our New Vermonter community members, many of whom had never used computers before. Over the course of the training provided by T4T, participants got the basic skills, competence, and confidence they needed to start using technology to meet their needs and help reach personal goals, ranging from learning how to communicate using email and navigate town using google maps, to searching for events and opportunities available in the community. Trainers were responsive, adaptive, and patient with both organizers and participants of the training, and T4T's experience and commitment to serving New Americans is exemplary.
