Technology For Tomorrow
### Empowering People in Need with Technology Education
A non-profit 501(c)(3) organization

Vision:

Those in need have access to affordable technology education that improves their quality of life personally, professionally, and in the community. People of all ages recognize and act upon the need for helping others.

Mission:

Technology for Tomorrow, a non-profit 501(c)(3) organization, empowers individuals and organizations by providing affordable technology and supporting skills training and enabling virtual opportunities through various local, state, and national collaboration efforts to help individuals and organizations reach their goals.

A Message from Board President Neel Desai

While this year didn't go as planned, our mission of providing technology education to underserved communities became even more important. Like others, we were forced to rethink our operation from the ground up and we took our programming fully online. We continued serving senior citizens, but also expanded to new Americans communities, and students who were homeschooled due to school shut-downs. We were also able to provide the infrastructure and logistics support for a number of organizations. Perhaps what we're most excited about we kicked off programming in Texas, Arizona, and Connecticut. Lastly, we thank the countless partners, donors, and supporters for your ongoing support and encouragement.

Participants Served by the Numbers

1,452 total learners served

50% of all learners were women

44% of all learners were older adults

70% of all older adults learners were women

13% of all learners were new Americans

67% of all new Americans learners were women

A Message from T4T Program Manager Bjorn Norstrom

Thank you for supporting Technology for Tomorrow. During 2020, we transitioned from on-location education and training to only virtual programs. We also expanded to Texas, Connecticut, and Arizona. We look forward to a great 2021 with your continued support for technology education, training, and supporting soft skills for underserved communities.
